WHY OUR CENTER STANDS OUT FROM THE REST

*Kids Village West is not just your traditional 'daycare' setting, but a preschool program offering before and after care.

*Kids Village West is an expansion of our current Missouri Accredited Preschool located in St. Clair.

What is Missouri Accreditation?

Missouri Accreditation provides quality standards for child care programs serving children from birth through school age within the state of Missouri. Missouri Accreditation functions in areas beyond the scope of state licensing requirements for child care facilities. Those regulations exist mainly to ensure the basic health and safety of the children in those programs. To receive Missouri Accreditation, a program has to exceed those standards.

Our Programs

Come see the difference
our program can make!!

Developing Literacy & Math

Exploring Science & Sensory

Building Social Skills

Creative Arts

Research shows that a *higher level of quality* in child care and educational settings is associated with children having enhanced social skills, reduced behavioral problems, increased cooperation and improved language skills. Most importantly, children acquire the skills to go out in the world and succeed!

Infant & Toddler Care

Our infant/toddler care offers one on one love and attention to help encourage trusting relationships between teachers and children. In the infant room, teachers foster each child's individual daily feeding and sleeping schedule. Through a safe and healthy learning environment, infants develop appropriate milestones, motor skills and self-help skills to ensure smooth transition to the toddler room.

Two Year Play & Learn

In our two year old program, children will make new discoveries daily! While two year olds' are beginning to develop a new sense of independence, our program will support learning and exploration through social interactions, sharing, and development of appropriate language skills. When given individual attention, children can learn the fundamentals they'll need to be successful in our preschool program.

Preschool Program

Preschoolers will learn about their environment through hands on learning experiences! Our preschool curriculum is project construct, which is a child directed learning experience. The curriculum will also follow the Missouri Pre-k Standards to ensure that your child is ready for kindergarten. All areas of development are included in the curriculum including; cognitive development, social/emotional skills, motor skills, and pre reading, writing, and math skills.

Before & After School Academic Program

Our before and after school program is for children ages 5-12 years of age and that are enrolled in the public school. Offering a great transition to and from school, we will provide breakfast and afternoon snack, learning activities, and an opportunity for children to do homework. We also offer care for ½ days, no school days, and summer breaks.
